Keep Your Brain Strong

Maintaining your brain’s health beyond age 65

Schedule your Medicare Annual Wellness Visit (AWV) today!
This establishes your Personalized Prevention Plan for health. This visit includes:
- Memory loss and depression screening
- Screening for all chronic diseases
- Update medical history, medications, family history
- Update immunizations

Take control of chronic diseases
Heart disease, diabetes, COPD, and high blood pressure can cause strokes. Strokes can cause some types of dementia.
- Diabetes control with A1C less than 8
- Blood pressure controlled with systolic less than 150 / diastolic less than 90
- Cholesterol less than 200; HDL greater than 60
- Stop smoking
- Take your prescribed medicines daily
- Get screened for hearing loss
- See your dentist every six months or more if you have problems with your teeth. If you have dentures, see your dentist every year.

Eat healthy foods
The proper diet can help slow decline in reasoning and understanding.
- Eat heart-healthy low-fat, lean-meat and vegetable-rich meals
- Mediterranean, MIND and DASH diets are suggested
- Visit www.myplate.gov for specific recommendations

Be active
Daily physical exercise is recommended to maintain strength, stamina, control chronic disease and the ability to live independently.
- 15-30 minutes of physical activity per day is recommended for improved health
- Examples are walking, swimming, dancing, cycling and gardening

Learn new things
Memory and thinking ability improve when we learn something new.
- Take a class: photography, language, music, computer processing, quilting
- Play card games, play chess or work crossword puzzles

Connect with family, friends, and communities
Positive interactions with other people improve well-being and mood. Untreated mood disorders can affect memory and thinking.
- Maintain your connection to church, family and community activities
- Engage in activities that give purpose and meaning to your life
